

ECG & SPIROMETRY

Our **Orbit™ Spirometer** is a Smart PC based system that connects with major EMRs and comes with Pre-calibrated mouthpieces and GLI-2012 predictors and includes a 3-year warranty.

The **Office Medic** software improves workflow by having one platform for ECG and Spirometry testing. Office Medic allows you to acquire, store and review diagnostic data using an off-the-shelf laptop, desktop or tablet.

Universal SmartECG : Z - 700 - 050

VectraplexECG Software &
Universal SmartECG Hardware COMBO : V100001

The **Universal SmartECG** Software uses Proven filtering and interpretation algorithms.

The **VectraplexECG** software uses just 5-electrodes to derive a 12 to 15-lead ECG and Comes with our innovative CEB® technology.

The **Cardiac Electrical Biomarker, CEB®**, is our smartest ECG technology! It can detect ECG changes suggestive of a heart attack.

Simply, it is a color-coded index number that measures the degree of di-polarity of the cardiac electrical field.
